

Star Wars Portal

As a Star Wars fan, I need an application to see information about the Star Wars Universe.

Functional Requirements

- The app should have a page where I can see the lists of characters and starships in different tabs. Each list should contain at least the name of the item.
- The app should have an item detail page.
 - On character detail, species should be shown.
 - On starship detail, pilots should be listed.

Non-functional requirements

- The SWAPI should be used [<https://swapi.dev/>].
- You can use UI libraries such as Bootstrap or Material Design.
- The code must be delivered on GitHub.
- The app should contain a README.md file explaining how to setup the environment and how to launch the application.
- Deployment, e.g: Netlify, Heroku, Vercel

Assessment Criteria

- Functional and Non Functional Requirements
- Code Quality
- Folder Structure
- Configuration
- Reusability
- Modularity
- Test Automation
- Versioning control
- Documentation
